Art Unit: 3724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 2, drawn to a cutting machine having a linear motion support system with bearings, searched in class 83, subclass 821.
 - II. Claim 3, drawn to a cutting machine having a threaded blade clamping means, searched in class 83, subclass 698.11.
 - III. Claim 4, drawn to a cutting machine having a second magazine, searched in class 83, subclass 954.

Claim 1 has features of none of the subcombination and will be examined with the elected invention. If claim 1 is ultimately determined to be allowable in it's current form, the claims dependent therefrom may be rejoined.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the cutting machine having a linear motion support system for the slide of group I can be used with a spring clamp, as opposed to the screw clamp of group II, and conversely, the cutting machine with the screw clamp of group II could be employed without the linear motion support system of group I. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different search and because of

Art Unit: 3724

their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ken Peterson whose telephone number is 703-308-2186. The examiner can normally be reached on Monday thru Thursday between 7am and 4pm. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082.

In lieu of mailing, it is encouraged that all formal responses be faxed to 703-872-9302. Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is 703-308-1148.
